

BR-3600
bed release agent

BR-3600 effectively prevents asphalt and other materials from sticking to truck beds

BR-3600 Bed Release Agent is a patented, completely non-toxic, and biodegradable solution for preventing material from sticking to the truck bed, while maintaining the chemical integrity of the asphalt mix. It is a 100% biobased solution.

100% biobased

- ✓ Does NOT contain petroleum or silicones
- ✓ Dilutable in water
- ✓ No offensive, harsh chemical odors
- ✓ Zero damage to asphalt blends
- ✓ Works in all temperatures
- ✓ Sprays on fast with conventional equipment
- ✓ Requires less material than toxic or conventional alternatives

Keeps materials moving

When sprayed onto the desired surfaces, BR-3600 removes the surface tension between the hard surface and the material you wish to move. Speed up paving applications and cleanup alike with BR-3600 and keep the planet and people safe while doing so.

BR-3600 is safe for the planet and its people.

Helps prevent:

- ✓ corrosion
- ✓ rusting

Unlimited potential

BR-3600 is designed to work in all conditions and on all surfaces. Unlike other release agents, it is not temperature dependant.

BR-3600 sprays down fast and will not release caustic, offensive odors. It is a safe and effective replacement that uses less material than conventional release agents that can be harmful to the environment. Apply BR-3600 once per load of material.

On a dry surface, the first application of BR-3600 should not be diluted in water. For the second application, use four to eight ounces per gallon of water. It's easily cleaned up with soap and water.

Use it for:

- dump trucks and loaders, and related equipment
- hand-operated equipment, such as shovels
- all paving equipment - no damage to asphalt mix
- anywhere a release agent is useful
