

Fast. Clean. Safe.

AR-3600 is safe for people and the environment, working as a natural replacement for caustic, toxic and other damaging materials formerly used to clean hard surfaces and equipment. It works fast and cleans up easily.

AR-3600 93% biobased

- ✓ Quickly removes all acrylics and asphalt formulations, including high-performance latex polymers used in superpave
- ✓ Non-toxic: no exposure to hazardous chemicals
- ✓ Biodegradable and environmentally friendly
- ✓ Unique chemistry designed for better penetration and easier cleanup
- ✓ Works in all conditions and climates

AR-3600

asphalt and tar remover

AR-3600 easily and safely removes petroleum and other oily materials and is a natural replacement for toxic solutions

Add AR-3600 to your cleanup routine

Cleans and protects

Protecting and caring for valuable equipment could not be easier with AR-3600. The solution contains a proprietary, non-toxic detergent system that allows for faster penetration and cleanup. It won't damage paint, including clearcoat finishes.

Why pay to replace equipment when it's as simple as spray, wait and rinse? AR-3600 extends the life of your equipment and reduces repair and maintenance costs.

AR-3600 works on all metal surfaces, including brass distributors and metering equipment. It even protects metal finishes. AR-3600 is also safe to use on most plastic surfaces, including vehicle brake lenses.

Works faster than petroleum-based alternatives

- ✓ diesel
- ✓ fuel oil
- ✓ kerosene
- ✓ gasoline

These materials are harmful to both the environment and the people using them to clean asphalt paving and spraying equipment, distributors and mixing plants.

AR-3600 is also useful for removing coke and other deposited materials present in heat transfer oil lines without costly, long-term plant shutdowns.

Cleans multiple surfaces and most equipment

- Trucks, pavers and related tools
- Painted surfaces
- Plastic surfaces
- All metals
- Machine parts, as a cold degreaser

AR-3600 works on hot or cold mixes with a simple water washdown after use.

Better for everyone

Avoid hazardous chemical exposure with AR-3600. It cleans paving equipment and is safe for the environment and the people using it. AR-3600 is an affordable, biodegradable solution that eliminates the time and energy wasted on managing chemical runoff.
